THE HOLLAND INNOVATIVE HOUSE AND OUR KNOWLEDGE NETWORK

Holland Innovative is a true platform of professionals where sharing knowledge to increase growth for its relations is essential. We strongly believe in cross-fertilization; by sharing knowledge and information between our professionals and our partners a strong network is created that is mutually beneficial and productive.

Together with our network of partners we are able to provide high level knowledge sessions for professionals of any organization that aims to either create a more robust product, to predict the lifespan of its products & systems or to speed up the market introduction by using different methodologies.

OUR KNOWLEDGE NETWORK:

WELCOME AT THE HI-ACADEMY

Holland Innovative helps to develop the competencies of you and your colleagues to strengthen your organization and create growth.

Hans Meeske, Evert-Jan van Donkelaar and Ivo Aarninkhof
Managing directors Holland Innovative

Together with renowned centres of expertise such as Eindhoven University of Technology, Twente University, Delft University of Technology and the University of Stuttgart we organize training and workshops in Project Management, Product & Process Development and Reliability Engineering. We offer both open enrolment and in company training; tailor-made to fully meet the needs and the strategy of your organization. Coupling these courses with practical experience is important in order to maximise the effectiveness. Where possible, your own cases/data are discussed during our training and/or further explored by coaching on-the-job, project participation. In order to accelerate your learning curve we organize regular User Groups and actively support you by applying the learnings in your projects.

HOLLAND INNOVATIVE ACADEMY

The **Holland Innovative Academy** offers training and workshops which are offered as open training but can be arranged as in-company training as well. The focus of the training and workshops is in the field of:

- Project Management
- Design for Six Sigma
- Data Science
- Reliability Engineering and Root Cause Analysis
- MedTech
