# WELCOME AT THE HI-ACADEMY

Holland Innovative helps to develop the competencies of you and your colleagues to strengthen your organization and create growth. Together with renowned centres of expertise such as Eindhoven University of Technology, Delft University of Technology and the University of Stuttgart we organize training and workshops in Project Management, Product & Process Development and Reliability Engineering. We offer both open enrolment and in company training; tailor-made to fully meet the needs and the strategy of your organization. Coupling these courses with practical experience is important in order to maximise the effectiveness. Where possible, your own cases/data are discussed during our training and/or further explored by coaching on-the-job, project participation and also in the User Groups.

## THE HOLLAND INNOVATIVE HOUSE AND OUR KNOWLEDGE NETWORK

Holland Innovative is a true platform of professionals where sharing knowledge to increase growth for its relations is essential. We strongly believe in cross-fertilization; by sharing knowledge and information between our professionals and our partners a strong network is created that is mutually beneficial and productive.

Together with our network of partners we are able to provide high level knowledge sessions for professionals of any organization that aims to either create a more robust product, to predict the lifespan of its products & systems or to speed up the market introduction by using different methodologies.
